

Datasets

Public Cybersecurity Datasets

1. **CIC IDS 2017 & 2018** – Intrusion detection system (IDS) datasets with various attack scenarios.
2. **NSL-KDD** – A widely used dataset for network intrusion detection.
3. **Malware Dataset by VirusShare** – A large collection of malware samples
4. **MITRE ATT&CK** – A framework for understanding cyber adversary tactics and techniques.
5. **PhishTank** – A dataset containing phishing URLs for phishing detection research.
6. **DNS Threat Intelligence (Umbrella)** – A dataset related to malicious domain names and DNS security.
7. **Stratosphere IPS Dataset** – A dataset for intrusion prevention research
8. **Common Vulnerabilities and Exposures (CVE) Database** – A catalog of known cybersecurity vulnerabilities.
